

PREFERRED RADIOLOGY PROGRAM (PRP)

FREQUENTLY ASKED QUESTIONS/ANSWERS

General Information

Which medical providers are affected by the PRP?	<ul style="list-style-type: none">• All freestanding diagnostic facilities, hospital outpatient diagnostic facilities, and any physician's office that provides PET scans, MRI, MRA, CTA or CT tests.• All providers who order PET scans, MRI, MRA, CTA and CT tests are required to precertify those procedures prior to services being rendered in these locations. Included are Preferred Medical Doctors (PMD), Blue Advantage[®] doctors (effective September 1, 2010), Participating Chiropractors, Preferred/Blue Advantage Certified Registered Nurse Practitioners and Preferred Physician Assistants.
When a radiology group has multiple locations, will Blue Cross credential each specific location or the physician?	Each imaging location is reviewed and credentialed for each modality provided. The PRP participating status continues to be site specific.
Are current PRP providers required to be certified by an applicable organization?	Yes, applicable organizations include: <ul style="list-style-type: none">▶ Intersocietal Accreditation Commission Nuclear/Positron Emission Tomography (IAC Nuclear/PET)▶ Intersocietal Accreditation Commission Computed Tomography (IAC CT)▶ Intersocietal Accreditation Commission Magnetic Resonance Imaging (IAC MRI)▶ Other national accreditation agencies as determined by corporation In addition to these accreditation entities, AIM Specialty Health performs scan quality reviews.
What process applies for general radiology?	General radiology services such as X-ray, ultrasound or mammography are not subject to precertification or AIM credentialing criteria. These services continue to be included as a PMD covered service.
How do I obtain the most current medical policy regarding the PRP Network?	All information regarding this program, including medical policies, is available on the Blue Cross and Blue Shield of Alabama provider website, AlabamaBlue.com/providers . Please see the dedicated Preferred Radiology Program web page.
What information can I find on the Blue Cross website?	The Blue Cross website is designed to serve as the comprehensive information source for the Preferred Radiology Program. Our site includes a full overview of this program and specific details, including which procedures require precertification, precertification numbers, and how to initiate a request for precertification on the website. Go to <i>ProviderAccess</i> at AlabamaBlue.com/providers , and at the top of the page click on Resources, followed by Programs & Initiatives, then Preferred Radiology Program .

PREFERRED RADIOLOGY PROGRAM (PRP)

FREQUENTLY ASKED QUESTIONS/ANSWERS

Contacting AIM

What is the precertification telephone number for AIM?	AIM can be contacted at 1-866-803-8002 for assistance with any questions related to the precertification process.
What are AIM's days and hours of operation?	<p>AIM is available from 8 a.m. to 5 p.m., Central time, Monday through Friday. AIM is closed in observance of the following holidays:</p> <ul style="list-style-type: none"> • New Year's Day • Martin Luther King Jr. • Memorial Day Independence Day • Labor Day • Thanksgiving Day and the day after Thanksgiving • Christmas Day <p>Online access via <i>ProviderAccess</i> is available 24 hours a day, seven days a week (except for occasional maintenance that may occur for a portion of Sundays).</p>

Precertification

What procedures require precertification?	<p>Precertification is required for:</p> <ul style="list-style-type: none"> • Positron emission tomography (PET) scans • Computerized axial tomography (CT) • Computed tomographic angiography (CTA) tests • Magnetic resonance imaging (MRI) • Magnetic resonance angiography (MRA) <p>The list of procedure codes that will require precertification via AIM is available on <i>ProviderAccess</i>.</p>
Do imaging services provided in a hospital inpatient or emergency room setting require a precertification?	No. PET scans, MRI, MRA, CT and CTA tests ordered during an emergency room treatment visit while in the observation unit or during an inpatient stay do not require a precertification.
If a Primary Care Network physician refers a patient to a specialist who determines that the patient needs a PET scan or CT test, who needs to request the precertification?	The physician who orders the image should request the precertification. In this case, it would be the specialist.
Do all Blue Cross and Blue Shield of Alabama plans require precertification?	Precertification is required for most Blue Cross and Blue Shield of Alabama contracts, but providers should always check Eligibility and Benefits to confirm a patient's specific precertification requirements.

PREFERRED RADIOLOGY PROGRAM (PRP)

FREQUENTLY ASKED QUESTIONS/ANSWERS

What information is needed to obtain a precertification?	<ul style="list-style-type: none">• Patient's first and last name, and date of birth• Ordering physician information• Requested tests—physicians' CPT code or description• Working diagnosis:<ul style="list-style-type: none">▶ Signs and symptoms▶ Results of relevant tests▶ Relevant medications
How can the referring provider indicate a particular case is urgent?	<p>For urgent cases during AIM's regular business hours (Monday through Friday from 8 a.m. to 5 p.m., Central time), please initiate those requests by calling AIM at 1-866-803-8002 and clearly advising the intake coordinator that the case is urgent. If the clinical reviewer is unable to approve the case, the referring physician may join the call and request to speak directly with one of AIM's physicians to expedite the urgent request. This physician-to-physician discussion should allow for prompt precertification determination by the conclusion of the call.</p> <p>Upon approval, precertification approval numbers will be issued and posted to <i>ProviderAccess</i>.</p>
What if the patient requires an urgent test and it is after AIM's regular business hours, a weekend or a holiday?	<p>For urgent requests after AIM's normal business hours, a weekend or a holiday, the referring provider should proceed with ordering the image. The referring provider needs to request the precertification within two business days of the service by providing the clinical indications for the examination, including the reason it was deemed urgent. Medical necessity criteria are still applied. Upon approval, precertification approval numbers are issued and posted to <i>ProviderAccess</i>.</p>
Does AIM employ physicians other than radiologists to review precertification requests?	<p>AIM employs and/or contracts with physicians of various specialties to respond to network needs.</p>
Who can verify if a precertification has been approved?	<p>The referring provider, imaging provider and hospital can verify if a precertification has been approved or not approved by checking the status via <i>ProviderAccess</i> on the Blue Cross website.</p> <p>Referring providers are notified of the precertification determination by telephone. Faxed approvals are issued in the event the telephone communication is unsuccessful or the provider specifically requests a written confirmation. Written notification is provided upon request if the rendering provider contacts AIM's Customer Service.</p> <p>If a precertification is not approved, the referring provider is informed of the reason for the denial, as well as what information is needed to reconsider the decision. Denial reasons are available through <i>ProviderAccess</i>.</p>

PREFERRED RADIOLOGY PROGRAM (PRP)

FREQUENTLY ASKED QUESTIONS/ANSWERS

If the precertification is approved, is the patient limited to a particular PRP providers?	No. The purpose of the precertification is to determine medical necessity, but does not dictate where the imaging study can be performed.
Is there an appeal process if a precertification is not approved?	Yes. Appeal rights are detailed in communications sent to providers with each adverse determination.
Can a diagnostic facility initiate the precertification for the referring provider?	The precertification should be initiated by the physician who has all the clinical information and determines the need for the diagnostic test. Therefore, it is the referring physician's responsibility to obtain the precertification. In addition, the referring physician should retain all clinical information.
What if the website is not available?	If the website is unavailable, contact AIM at 1-866-803-8002 to initiate a new precertification or to check status of a previously submitted precertification request.
If <i>ProviderAccess</i> is down, can you access authorizations through the AIM portal instead?	No, all precertifications should be obtained via <i>ProviderAccess</i> . If our portal is down, you would need to call AIM for the precertification at 1-866-803-8002.
How long will a precertification approval be valid?	Precertifications are valid for a period of 60 days from the date of approval.
A precertification is valid for 60 days. If a patient comes back within that time frame for follow-up and another image is needed, will a new precertification be required?	Yes.
Does the precertification/case number have to be included on the claim form when filing for the imaging services?	No.
Can a referring provider use a third-party to transmit information to and from AIM?	<p>The intent of the program has always been for referring physicians to provide clinical justification for the referral, which must be supported by the patient's medical record.</p> <p>It is at the discretion of the referring physician to select a method to complete the precertification process. However, it is the responsibility of the referring physician to ensure the accuracy and integrity of the information provided to AIM.</p> <p>Failure to comply with the precertification requirements may result in claim refunds or other steps that affect your continued participation in the PRP or PMD Program.</p>

PREFERRED RADIOLOGY PROGRAM (PRP)

FREQUENTLY ASKED QUESTIONS/ANSWERS

Will we be able to verify authorization numbers online?	Yes, you will be able to verify authorization numbers and see other information online pertaining to the request.
Will clinical data need to be entered for all requests?	Yes, all precertification requests will require clinical information to be entered.
Can a radiology facility request a user ID and sign-on with AIM?	A direct sign-on with AIM is not required. All providers should access AIM through <i>ProviderAccess</i> by clicking the green “Go” button returned through Eligibility and Benefits when precertification is required for a specific patient.
If you get a precert for one facility and the patient decides to use another facility in the area, do you have to correct the precert with AIM?	No.
If the authorization does not cross over to AIM and the claim is denied, can we still give the authorization to BCBS directly or do we need to contact AIM?	Contact Blue Cross Customer Service with your authorization number and they will contact AIM to resend that precertification information.
Currently MRI Pelvis 72195 automatically requires an ultrasound when the clinical relates to a pelvic bone condition, not female pelvic. How do we get around that issue?	Pelvic MRI does not always require an ultrasound. It depends on the clinical scenario. Depending upon what is being evaluated, there will be a different set of clinical questions.

Precertification Process

If there is no GO button for precert, does that mean no precert is required?	For Blue Cross and Blue Shield of Alabama plans, if there is no button to initiate a precertification, then no precertification is required. This does not apply to out-of-state Blue Plans.
What if the referring provider’s office does not know the specific test that needs to be ordered?	AIM will assist the physician’s office in identifying the appropriate test based on presented indications and the CPT code. AIM medical directors are also available for assistance. Call 1-866-803-8002 to get assistance from AIM.
If the referring provider orders a CT/CTA or MRI/MRA without contrast, but the radiologist thinks it would be more appropriate to perform the service with contrast, will that require a correction to the precertification on file?	No. The radiologist has the ability to make that change without a call to or permission from AIM.

PREFERRED RADIOLOGY PROGRAM (PRP)

FREQUENTLY ASKED QUESTIONS/ANSWERS

If the referring provider obtains an approved precertification for a specific CPT code and the radiologist determines that another CPT code is more appropriate, can the radiologist make that change?	Yes. The radiologist must call AIM within two business days to update the CPT code precertification request. Medical necessity criteria are still applied. AIM can be contacted at 1-866-803-8002.
How do we make sure our in-office MRI is listed as a selected site?	The site of service is not required. You should search for “BCBS” and select “BCBS Imaging Provider” in the facility search in order to proceed to the next step.
So it is my understanding that there are only 300 characters allowed for clinic notes. If so, can we fax the notes instead?	AIM’s process regarding faxing additional clinical information is to only accept faxes when specific information has been requested by AIM for a particular case.
What if a referring doctor is not in your list? Do we add it?	Referring physicians can be manually added during case initiation with the AIM call center only.
If the physician is not present for a peer-to-peer, can another clinical staff member complete it?	Only a nurse practitioner, physician assistant or another physician colleague can participate in peer-to-peer.
Regarding the peer-to-peer questions, is it just a one-session option?	Yes. One peer-to-peer discussion will result in determination (approval, denial, withdrawn request).
Do peer-to-peer reviews have to be set up beforehand or can we call when our doctor is in the office and speak to a peer-to-peer doctor then?	Peer-to-peer reviews are offered at intake if criteria is not met (both on Portal submittals and in the AIM call center). The physician can be transferred to the AIM MD reviewer if available. Otherwise, the case will pend for additional review for established turnaround time prior to case closure to allow for the physician to call back. The case turnaround time is 3 business days (10 calendar days for Blue Advantage patients).
Is there a way to submit clinicals by webpage using attachments?	This is not currently available for radiology precerts.
Can you list multiple ICD-10 codes/reasons for scans to be done?	No, only one ICD code is applicable per exam request. The most appropriate reason for the study should be entered.
Will AIM fax the requesting physician’s office with an approval notification once a decision has been determined on a case?	Yes, approval and denial letters (as well as appeal letters) are faxed to the ordering physician assigned to the request. If the fax is not transmitted successfully, letters are mailed via USPS.
What do you do if the status shows incomplete?	Incomplete status means that the request was not submitted to AIM for review. Status will reflect “pending” if it requires additional review until a determination is made.

PREFERRED RADIOLOGY PROGRAM (PRP)

FREQUENTLY ASKED QUESTIONS/ANSWERS

Preferred Authorization Program

What is the Preferred Authorization Program (PAP), and how does it work?	The Preferred Authorization Program (PAP) recognizes Preferred Medical Doctors (PMDs) who consistently exceed minimum approval rates for a designated period of time. PAP physicians receive automatic approval on precertifications initiated for CT, MRI, and/or PET scans through AIM prior to scheduling services.
What is the PAP eligibility criteria?	<ul style="list-style-type: none"> • To be eligible for the Preferred Authorization Program, the Resolution Approved rate must meet a minimum threshold of 80%. • To remain eligible for the Preferred Authorization Program, the Clinical Result Type Approved rate must meet a minimum threshold of 80%. • The provider must have 50 precertification requests over a 12-month period.
How often will providers be re-scored?	Re-evaluation of each provider’s performance will be conducted annually to determine eligibility for continued participation in the program.

Radiology Profile

What is the Radiology Profile?	<p>The Radiology Profile helps providers who request radiology precertifications track their performance and view other helpful information including:</p> <ul style="list-style-type: none"> • Number of precertifications ordered, approved, reviewed, denied, redirected or withdrawn by tax ID or NPI • Detailed member information • Clinical rationale for denied cases • Clinical result types
How do I access the Radiology Profile?	To access the Radiology Profile on <i>ProviderAccess</i> , click on Profiles & Reports in the main menu, and then click “Radiology Profile by Physician” or “Radiology Profile by Tax ID” under Efficiency and Quality.
How often is the Radiology Profile updated?	The Radiology Profile is updated monthly.
What data is used in the Radiology Profile?	Precertification data from AIM Specialty Health is used in the profile and for PAP eligibility.

Aim Specialty Health (AIM), an independent company, provides evidence-based cancer treatment information to physicians on behalf of Blue Cross and Blue Shield of Alabama.

BlueCross BlueShield of Alabama

An Independent Licensee of the Blue Cross and Blue Shield Association
